SUPERVISING REINFORCING STEEL BAR FABRICATION & INSTALLATION

Course Description:

A 2-day seminar/workshop designed for engineers who wanted to upgrade their supervisory skills and knowledge in reinforcing steel bar construction. The course consists of lecture/discussion and workshops covering proper rebar fabrication and installation.

Course Objectives:

At the end of the seminar, the participants are expected to;

- Describe the process of fabrication and installation of steel reinforcements;
- Plan reinforcing steel fabrication and installation activities;
- Assign and coordinate resources for fabrication and installation of steel reinforcements;
- Evaluate reinforcing steel fabrication and installation work results as to their compliance with relevant project specification or standard.

Target Participants:

- Engineers
- Engineering graduates
- Senior Civil engineering student
